## Software Engineering Student | Business Intelligence and Applied AI

Abbottabad, Pakistan | +92 301-872777 | LinkedIn Profile

### PROFESSIONAL SUMMARY

Software Engineering undergraduate at COMSATS University Islamabad with an expected graduation in 2027. Focused on business intelligence, data analysis, and human-centered AI, with working knowledge of SQL, Python, statistical analysis, data modeling, ETL workflows, and dashboard design.

### EDUCATION

**Bachelor of Science in Software Engineering**

COMSATS University Islamabad, Abbottabad Campus

Expected graduation: 2027 | Currently in the 7th semester

### TECHNICAL SKILLS

**Programming and data:** Python, SQL

**Analytics:** Statistical and regression analysis, data modeling, ETL workflows, dashboard design, business storytelling

**Research areas:** Artificial intelligence, human-computer interaction, human-centered system design

### SELECTED PROJECT AND RESEARCH CONCEPTS

**CoreSearch | Research proposal**

Multimodal digital-forensics concept for analyzing evidence and supporting evidence-chain processing.

**FutureLink | Project concept**

Location-based freelancer marketplace concept using geospatial matching and escrow-protected payments.

**HumanCraft | Research concept**

Privacy-preserving multimodal retrieval-augmented generation concept for digital heritage preservation.

**Q-PoEL | Research concept**

Hybrid quantum-classical trust model concept for digital asset verification.

### CAREER INTERESTS

Seeking internship opportunities and research collaborations in business intelligence, data analytics, applied AI, and human-computer interaction.
